LAUGH IT OFF

Have you laughed today? If so, you probably did a good thing for your health.

Psychologists now consider laughing to be an important practice for good health. Laughter is known to reduce stress, improve the body's ability to fight disease, and make life happier and more interesting. It adds to the pleasure we get from other people and the enjoyment other people get from us.

Dr. Madan Kataria, the founder of Laughter Yoga, discovered that laughter does not have to be real to be good for the body. In Laughter Yoga, people combine yoga breathing with laughter exercises in a group. This allows people to practice laughing without the presence of humor.

Dr. Kataria has found that the body responds well just to the physical act of laughing.

Dr. Annette Goodheart was one of the first doctors in the U.S. to promote laughter for health. In her book *Laughter Therapy: How to Laugh About Everything in Your Life That is Not Really Funny*, she writes, "Everyone usually knows what they think is funny or can laugh at. But I help people laugh about things that aren't funny and support them in re-balancing and resolving their pain."

People who say that laughter is the best medicine might be right. A laugh a day keeps the doctor away!
