14 Multiple choice questions

Term 1 of 14

Is HH heterozygous or homozygous?

- Recessive
- Dominant
- Dominant traits means the trait that is more likely to happen
- homozygous

Term 2 of 14

What does Homozygous mean?

- It means a trait where both alleles are the same.
- It means a trait where both alleles different.
- Recessive traits are the trait that are less likley to happen and is the hidden gene
- Dominant traits means the trait that is more likely to happen

Term 3 of 14

Is dark hair a dominant or recessive trait?

- homozygous
- Recessive
- heterozygous
- Dominant

Term 4 of 14

Does a recessive trait have 1 copy of the allele or 2?

- Dominant
- Recessive
- 1 copy of the allele
- 2 copies of the allele

Term 5 of 14

What does recessive traits mean?

- Recessive traits are the trait that are less likley to happen and is the hidden gene
- It means a trait where both alleles are the same.
- It means a trait where both alleles different.
- Dominant traits means the trait that is more likely to happen

Term 6 of 14

Does a dominant trait have 1 copy of the allele or 2?

- 2 copies of the allele
- Dominant
- 1 copy of the allele
- Recessive

Term 7 of 14

What does Heterozygous mean?

- Dominant traits means the trait that is more likely to happen
- It means a trait where both alleles are the same.
- Recessive traits are the trait that are less likley to happen and is the hidden gene
- It means a trait where both alleles different.

LIVEWORKSHEETS

Term 8 of 14

Are blue eyes a dominant or recessive trait?

- ○ **Recessive**
- ○ **homozygous**
- ○ **Dominant**
- ○ **2 copies of the allele**

Term 9 of 14

Is blond hair a dominant or recessive trait?

- ○ **homozygous**
- ○ **Dominant**
- ○ **Recessive**
- ○ **heterozygous**

Term 10 of 14

Is normal vision a dominant or recessive trait?

- ○ **Recessive**
- ○ **homozygous**
- ○ **2 copies of the allele**
- ○ **Dominant**

Term 11 of 14

Is color blindness a dominant or recessive trait?

- ○ **heterozygous**
- ○ **Recessive**
- ○ **1 copy of the allele**
- ○ **Dominant**

Term 12 of 14

Is bb heterozygous or homozygous?

- ○ **Recessive**
- ○ **homozygous**
- ○ **heterozygous**
- ○ **Dominant**

Term 13 of 14

Are brown eyes a dominant or recessive trait?

- ○ **Dominant**
- ○ **2 copies of the allele**
- ○ **homozygous**
- ○ **Recessive**

Term 14 of 14

What does dominant traits mean?

- ○ **It means a trait where both alleles are the same.**
- ○ **It means a trait where both alleles different.**
- ○ **Recessive traits are the trait that are less likley to happen and is the hidden gene**
- ○ **Dominant traits means the trait that is more likely to happen**
