I think it \_\_\_\_\_ yesterday.

7 What crop did the farmer grow last year?

He \_\_\_\_\_ cotton.

8 Did they see any wildlife?

Yes, they \_\_\_\_\_ lions and cheetahs.

**(8 points)**

# Reading

## 9 Read. Write the paragraph number next to each description.

Have you ever stood on the ground and wondered what's beneath your feet? Take a moment to think about it. It could be power and communication cables. It might be a network of trains carrying passengers across a city. Or it might even be pipes carrying waste water away to a treatment plant. And all of this is possible thanks to the construction of tunnels.

Tunnels are an engineering wonder. In Roman times, engineers constructed tunnels to carry water from mountain springs into cities and villages. Later, in the 19th and 20th centuries, the construction, and uses, of tunnels became much more advanced.

Nowadays, it seems engineers can build tunnels anywhere. For example, the Mont Blanc pass is a tunnel that goes through the mountains in the Alps. The Seikan tunnel in Japan goes deep under the sea, linking the islands of Honshu and Hokkaido, and one of the most breathtaking constructions is Iceland's 'Into the Glacier' tunnel that gives tourists the opportunity to walk deep inside Langjokull, Iceland's second biggest glacier.

Essentially, tunnels are time saving constructions. Whilst it might take years to physically build a tunnel, the purpose of them is to allow for greater convenience and ease of getting from one place to another. And this doesn't just apply to humans. There are plenty of examples from around the world where tunnels have been constructed to help wildlife safely cross roads or avoid other man-made dangers.

So, the next time you're out and about, have a good look around you and notice your surroundings. Then, take that extra moment to consider the engineering feats you *can't* see, as well.

- 1 \_\_\_\_\_ to give examples of tunnels in different places
- 2 \_\_\_\_\_ to give examples of different uses for tunnels
- 3 \_\_\_\_\_ to give a brief history of the development of tunnels
- 4 \_\_\_\_\_ to give a conclusion and offer the reader something to think about
- 5 \_\_\_\_\_ to give an introduction to the topic of the article

(5 points)

## 10 Read the article again. Then circle T (true) or F (false).

- |   |  |   |   |
|---|--|---|---|
| 1 | Communication cables are often situated underground.                 | T | F |
| 2 | The Romans used tunnels so villagers could easily get to the cities. | T | F |
| 3 | Tunnels were first constructed in the 19th century.                  | T | F |
| 4 | It isn't possible to build a tunnel under water.                     | T | F |
| 5 | 'Into the Glacier' is a tourist attraction.                          | T | F |
| 6 | People use tunnels to save time.                                     | T | F |
| 7 | It is dangerous for animals to use man-made tunnels.                 | T | F |

(7 points)
