Read the following advertisement and choose the option that best fits each of the numbered blanks from 1 to 6.

ASEAN Youth Camp for Sustainable Development

Join the Movement for Sustainable Change!

Are you passionate about creating a sustainable future? The ASEAN Youth Camp for Sustainable Development is (1) _____ young people from across ASEAN and Timor-Leste to be part of an exciting initiative to drive change!

This one-week camp will bring together youth representatives to deepen (2) _____ understanding of the Sustainable Development Goals (SDGs), develop leadership skills, and explore ways to use digital tools for sustainable growth. It's your chance (3) _____ with other young leaders and work together to tackle the challenges of today and tomorrow.

Who can participate?

- Young people aged 18-30
- From ASEAN Member States and Timor-Leste
- Good (4) _____ of English
- Interested in sustainable development and community innovation

What's in it for you?

- Strengthen your knowledge of SDGs
 - Improve leadership and (5) _____
 - Build connections with like-minded youth from across ASEAN
 - Gain experience in (6) _____ SDG projects in your community
- Apply now and be part of a global movement for change!

Question 1.

- A. taking over B. calling on C. cheering up D. looking up

Question 2.

- A. their B. our C. its D. your

Question 3.

- A. connected B. to connect C. connect D. connecting

Question 4.

- A. command B. effort C. progress D. knowledge

Question 5.

- A. innovation skills social B. social innovation skills
C. innovation social skills D. social skills innovation

Question 6.

- A. establishing B. implementing C. monitoring D. evaluating

Read the following leaflet/notice and choose the option that best fits each of the numbered blanks from 7 to 12.

Processed Foods: A Hidden Danger to Your Health

Processed foods (7) _____ a regular part of our diets due to their convenience and low cost. (8) _____, these foods are often packed with unhealthy ingredients such as sugar, salt, and fats, which can harm your health over time.

The Risks of Processed Foods

Many processed foods contain hidden sugars, artificial additives, and unhealthy fats. Regular consumption of these can lead to obesity, heart disease, and (9) _____ chronic health issues.

Common Processed Foods

Processed foods include items like sugary cereals, packaged snacks, and frozen meals. These are often high in sodium and artificial flavors, (10) _____ can be harmful if eaten in large amounts.

How to Reduce Processed Foods in Your Diet

- Focus on fresh fruits, vegetables, lean meats, and whole grains.
- Preparing meals at home ensures you know exactly what is in your food.
- Always read labels to avoid hidden sugars, unhealthy fats, and (11) _____.
- Slowly reduce processed food intake to (12) _____ your taste buds.
- Meal prepping can help you make healthier choices and avoid processed options.

By making small, mindful changes, you can improve your diet and overall health!

Question 7.

- A. will become B. become C. became D. have become

Question 8.

- A. Therefore B. Otherwise C. Furthermore D. However

Question 9.

- A. the other B. others C. another D. other

Question 10.

- A. where B. which C. when D. who

Question 11.

- A. adds B. addition C. additional D. additives

Question 12.

- A. balance B. enhance C. adjust D. manage

Read the following passage and choose the option that best fits each of the numbered blanks from 13 to 17.

Question 13. a. Noah: And also, many animal homes disappear, which is very sad to think about.

b. Noah: If people keep cutting down the rainforests, the weather will change badly.

c. Olivia: I worry about this problem; we will have much more extreme hot days.

- A. b - a - c B. a - c - b C. b - c - a D. c - a - b

Question 14. a. Priya: Don't worry too much, many people who work in tourism speak good English.

b. Priya: Just learn a few basic words in the local language, like "hello" and "thank you."

c. Omar: Good idea, I will download a translation app before my flight tomorrow.

d. Omar: That makes me feel better about ordering food and asking for directions easily.

e. Omar: I worry that I won't understand the language when I visit Vietnam next week.

- A. e - a - c - b - d B. b - d - c - a - e

- C. e - a - d - b - c D. b - d - e - a - c

Question 15. Dear Principal Son,

I am writing to propose an idea for a special event at our school called ASEAN Awareness Week.

a. This week would help us all learn more about our region and celebrate its diversity.

b. We could organize a few simple activities, like trying some foods from ASEAN nations, setting up a small display of flags, or watching short educational videos about each country.

c. I believe this would be a great addition to our school year and help us become better global citizens.

d. ASEAN is an important group of countries in Southeast Asia. Learning about their different cultures, geography, and history is important for all students.

e. These activities could be easy to manage during lunch breaks or within certain classes.

I am confident this would be a fun and educational week for everyone. Could I meet with you briefly to discuss this idea further?

Thank you for your consideration.

Sincerely,

Ngo Dan Thanh

- A. d - a - e - c - b

- B. b - e - c - d - a

- C. a - c - d - b - e

- D. c - d - a - b - e

Question 16. a. This forces animals to move to new areas, but often they cannot find enough food there or adapt fast enough.

b. The changing climate also confuses natural signals, making birds migrate too early or sea turtles lay eggs that produce only female offspring.

- c. As temperatures rise, the habitats of many animals, like the Arctic sea ice for polar bears, begin to melt or disappear.
- d. Because of these rapid changes, many species are facing a high risk of becoming extinct if we do not act soon.
- e. Global warming has serious negative effects on wildlife all around the world.

A. b - d - c - a - e

B. e - c - a - b - d

C. a - b - e - c - d

D. c - a - d - b - e

Question 17. a. ASEAN countries should support sports programs for young people because exercise is very important for their health and happiness.

b. In the end, investing in youth sports is an investment in a healthier, more united, and more successful ASEAN region.

d. Playing sports can also increase national pride and create strong friendships between countries through competitions like the Southeast Asian (SEA) Games.

c. These programs help teenagers stay active and also teach them useful skills, such as discipline and working well with others.

e. Encouraging young talent early allows nations to develop future professional athletes who can succeed internationally.

A. a - c - d - e - b

B. c - e - b - a - d

C. c - e - d - b - a

D. a - c - d - b - e

Read the following passage and choose the option that best fits each of the numbered blanks from 18 to 22.

Sea level rise refers to the gradual increase in the level of the world's oceans due to the impacts of global warming. A major cause of global warming is the burning of fossil fuels, (18) _____. The majority of this heat is absorbed by the oceans, causing the water to warm up and expand. As a result, sea levels are rising across the globe.

Global warming also has a significant effect on land-based ice, such as glaciers and ice sheets found in regions like Greenland and Antarctica. These large ice masses usually melt during the warmer months of the year, but they are replenished during colder months. However, as global temperatures rise year-round, (19) _____.

(20) _____. It leads to stronger storm surges, increased flooding, and damage to coastlines. Many large cities and important ecosystems are located in these areas, so people living in these regions may be forced to relocate. (21) _____. Despite having seen these impacts, predicting the exact rise in sea levels remains challenging. Nonetheless, it is a critical issue that must be closely monitored (22) _____.

Question 18.

A. emitting carbon gas and other gases to prevent heat from escaping the atmosphere

B. which releases carbon dioxide and other gases that trap heat in the atmosphere

C. sending out carbon gas and other pollutants which are held heat in the atmosphere

D. this lets out carbon dioxide and other gases that keep the warmth in the atmosphere

Question 19.

A. which are causing glaciers and ice caps to melt faster than before, leading to noticeable ice loss

B. the melting rate of glaciers and ice caps is speeding up because ice loss happens rapidly

C. glaciers and ice caps are melting at a much faster rate, leading to a considerable loss of ice

D. it rapidly accelerates melting of glaciers and ice caps, caused a significant loss of ice mass

Question 20.

A. The rise in sea levels presents a serious threat to coastal areas worldwide

B. If sea levels continue to rise, large areas of coastal land will disappear completely

C. Coastal regions worldwide face a serious threat despite rising sea levels

D. The growth of sea levels which is a pressing threat to coastlines worldwide

Question 21.

A. Soil and groundwater in inland areas are increasingly contaminated by seawater despite rising sea levels

B. Even areas further inland are affected, as rising seas can contaminate soil and groundwater with salt

C. It can even threaten deeper inland areas if rising seas are able to poison soil and groundwater with

salt

D. Rising seas can lead to salt contamination in soil and groundwater, affected regions further inland

Question 22.

A. letting coastal regions put the required measures in place to be ready for the impacts

B. so that coastal regions can take the necessary steps to prepare for the consequences

C. it is necessary for coastal areas to take preparatory measures to handle its consequences

D. because areas along the shoreline can prepare properly for the upcoming challenges

Read the following passage and choose the best answer to each of the following questions from 23 to 30.

1. On October 26, 2025, Timor-Leste officially became the 11th member of ASEAN, completing a process that started when it received observer status in 2022. This event marked an important step for the country as it became part of Southeast Asia's main trade and policy network. It also showed Timor-Leste's transformation from a small developing economy into a recognized member of regional cooperation and growth.

2. Joining ASEAN brings many clear advantages for Timor-Leste. The country now has more opportunities to share its perspectives and strengthen its position in the international community. It can also exchange experiences in national development, education, and human resources with other ASEAN members. Economically, ASEAN membership allows Timor-Leste to join trade agreements with major partners such as China and South Korea and to expand its tourism industry, which is seen as a key area for future growth.

3. For ASEAN, welcoming Timor-Leste expands cooperation and demonstrates the organization's unity and prestige. Timor-Leste's Prime Minister Xanana Gusmao said this step continues ASEAN's vision of a family of nations connected by shared values and goals. The decision to include Timor-Leste reflects ASEAN's spirit of solidarity, inclusiveness, and leaving no country behind in the region's development.

4. However, Timor-Leste still faces many challenges. According to a 2025 World Bank report, only 30.5% of its population is part of the labor force—much lower than in neighboring countries. Still, ASEAN members have pledged assistance in human resource training and infrastructure development. Becoming part of ASEAN is just the beginning of a new journey full of both opportunities and challenges, but with political stability and steady growth, Timor-Leste is expected to move confidently toward a more sustainable future.

Question 23. The word perspectives in paragraph 2 could be best replaced by _____.

A. strategies

B. viewpoints

C. identities

D. attitudes

Question 24. The word its in paragraph 2 refers to _____.

A. China's

B. South Korea's

C. Timor-Leste's

D. ASEAN's

Question 25. Which of the following is NOT mentioned as one of the benefits Timor-Leste gains from joining ASEAN?

A. Sharing knowledge on development and education.

B. Receiving foreign investment for infrastructure.

C. Enhancing global standing and recognition.

D. Growing tourism sector to develop economy.

Question 26. The word prestige in paragraph 3 is OPPOSITE in meaning to _____.

A. conflict

B. inequality

C. dishonor

D. failure

Question 27. Which of the following best paraphrases the underlined sentence in paragraph 4?

A. However, thanks to human resources and infrastructure, ASEAN countries have promised to provide assistance.

B. However, ASEAN has committed to supporting the upskilling of workers to help infrastructure improvement.

C. However, ASEAN countries not only support workforce training but also commit to backing infrastructure development.

D. However, ASEAN nations have agreed to develop skilled talent and invest in major infrastructure projects.

Question 28. Which of the following is TRUE according to the passage?

A. Joining ASEAN shows Timor-Leste's ambition to economic and cultural development and regional integration.

B. Timor-Leste's membership enables ASEAN to strengthen its credibility and responsibility on the

international stage.

C. The neighboring countries likely possess significantly higher rates of active working populations than Timor-Leste.

D. Joining ASEAN helps Timor-Leste deal with immediate economic and development challenges effectively.

Question 29. In which paragraph does the author mention a guiding principle of ASEAN in its efforts to develop the entire region?

A. Paragraph 3.

B. Paragraph 1.

C. Paragraph 2.

D. Paragraph 4.

Question 30. In which paragraph does the author mention that becoming an ASEAN member requires going through different stages?

A. Paragraph 4.

B. Paragraph 3.

C. Paragraph 1.

D. Paragraph 2.

Read the following passage and choose the best answer to each of the following questions from 31 to 40.

1. When Ph.D. student Melissa Versteeg reviewed her measurements, she worried something was wrong because the fish appeared to be shrinking. Her supervisor, Theresa Rueger, a marine biologist at Newcastle University, confirmed the accuracy after several checks. **[I]** Published in Science Advances, this study represents the first recorded case of a coral reef fish reducing in size due to environmental stress. Although scientists have previously noted population-level changes, confirming shrinking in the same individuals is rare. Researchers think this adaptation may help the fish survive high temperatures.

[II]

2. The discovery was entirely unanticipated. “We hadn’t planned to study the heat wave,” explained Rueger. Versteeg had been examining how environmental factors affected breeding pairs of wild clownfish in Kimbe Bay, Papua New Guinea. **[III]** When a heat wave raised sea temperatures by 4°C above average, the team chose to continue their observations, recording water conditions and fish measurements monthly from February to August 2023.

3. Using scuba gear, scientists gently caught the clownfish with small nets and measured them with calipers, a process taking less than 30 seconds per fish. **[IV]** Results were surprising: 71% of female and 79% of male breeding fish shrank at least once during the study, and 41% shrank multiple times. Interestingly, pairs that shrank together were more likely to survive the heat wave.

4. The reason behind this behavior remains unclear. Clownfish already have a unique ability to control their growth depending on their social hierarchy. When the dominant female dies, the largest male changes into a female, while the next biggest male becomes her mate. They can even slow or accelerate growth depending on available space in the group.

5. This ability helps them avoid conflict and conserve energy for survival. However, shrinking during heat waves appears to be a new adaptive behavior. Rueger suggests that clownfish may shrink to fit inside smaller anemones damaged by heat, or because reduced size requires less food and oxygen—an efficient survival strategy in stressful marine conditions.

Question 31. The word unanticipated in paragraph 2 is OPPOSITE in meaning to _____.

A. thrilled

B. inspired

C. surprised

D. expected

Question 32. Which of the following best summarises paragraph 2?

A. Clownfish research in Papua New Guinea changed focus when sea temperatures rose 4°C above average.

B. The research team unexpectedly studied clownfish responses during a 4°C heat wave in Papua New Guinea.

C. Ongoing clownfish research shifted its focus to a sudden heat wave that raised sea temperatures by 4°C.

D. Clownfish responses were recorded during February–August 2023 after a 4°C unexpected heat wave.

Question 33. The word them in paragraph 3 refers to _____.

A. observations

B. nets

C. clownfish

D. scientists

Question 34. Where in the passage does the following sentence best fit?

The results revealed that individual clown anemonefish (Amphiprion percula) were actually getting smaller during a marine heat wave.

A. [I]

B. [II]

C. [III]

D. [IV]

Question 35. Which of the following is NOT mentioned as one of the research results in the passage?

- A. Most of male clownfish shrank at least once.
- B. Pairs shrinking together survived heat waves better.
- C. Nearly half of clownfish shrank more than once.
- D. Heat waves caused long-term behavioral changes.

Question 36. Which of the following best paraphrases the underlined sentence in paragraph 4?

- A. Growth rate can increase or decrease depending on the space they occupy in the group.
- B. The amount of space in the group determines whether they speed up or slow down growth.
- C. In response to limited space, they adjust by increasing or decreasing their growth rates.
- D. They are able to change their growth rate counting on their surrounding spatial environment.

Question 37. The word conserve in paragraph 5 could be best replaced by _____.

- A. store
- B. maintain
- C. save
- D. produce

Question 38. Which of the following is TRUE according to the passage?

- A. Before this study, scientists only observed size changes across entire groups, not within single organisms.
- B. The process of capturing and measuring each clownfish is detailed and requires significant time per fish.
- C. A study published in Science Advances has supported previous views on the reduction in organism size.
- D. Clownfish can flexibly change sex to meet reproductive needs and expand the group's population.

Question 39. Which of the following can be inferred from the passage?

- A. The strict hierarchy of clownfish is maintained through differences in reproductive output among group members.
- B. Clownfish are compelled to change their behaviors to adapt because of habitats shrinking from global warming.
- C. The new size adaptation is beneficial because smaller fish require less energy to maintain basic bodily functions.
- D. Starting with worries, the researchers demonstrated that global warming impacts the size changes of species.

Question 40. Which of the following best summarises the passage?

- A. Researchers discovered that during heatwaves, clownfish shrink their body size, allowing them to survive by conserving energy and occupying the limited space of anemones.
- B. A study demonstrated that clownfish shrink at the individual level to respond to heatwaves, efficiently surviving elevated temperatures and limited resource availability.
- C. During a marine heat wave, individual clownfish were observed shrinking, likely as an adaptive strategy to survive high temperatures, marking the first recorded instance.
- D. Scientists found that most male and female clownfish shrank during prolonged heat, demonstrating a novel adaptation built upon their existing social growth control abilities.
