

A..Read the paragraph and answer the questions

Some people spark a light in our lives. These people could be our family, relatives, friends or well-known people. Canan

Dagdeviren, a Turkish physicist, is also one of these inspirational people. She was born in 1985 in Istanbul, Türkiye.

She completed her primary and secondary education in Kocaeli, Türkiye. She graduated from the Department of Physics Engineering at Hacettepe University in 2007.

She worked on flexible and foldable electronic devices. She invented battery-free cardiac pacemaker and a device for diagnosing skin cancer. She won the Illinois Innovation Prize.

Her life inspires young people. We can also achieve our dreams if we work hard. Maybe we are the next inspirational person.
