Exercise 3. Read the sentences. Choose the correct animal.
There are **three extra** animals.

Animals:
A. worm
B. spider

LIVEWORKSHEETS

C. butterfly
D. bee
E. cricket
F. ant

G. bug

H. snake

1. This animal has more legs than a bee, but it cannot fly.
   → _____
2. This animal can fly like a butterfly, but it makes honey.
   → _____
3. This animal has no legs and lives under the ground.
   → _____
4. This animal can jump, but it does not make a web.
   → _____
5. This animal is very small and works together with others every day.
   → _____

Exercise 4. Read the text. Choose the correct answer.

Many small animals live in our gardens and parks. Some of them can fly, and some cannot. The bee and the butterfly both have wings and can fly, but they are not the same.
Bees make honey and help flowers grow. Butterflies have big, colourful wings, but they do not make honey.

The spider and the ant cannot fly. A spider has eight legs and makes a web to catch insects. An ant has six legs and lives and works with many other ants. Ants are very small but very strong.

The cricket can jump and makes a loud sound at night. It has six legs, like an ant, but it does not live in a group.
The worm is different from all the others. It has no legs and lives under the ground.

1. Which animal can fly and make honey?
   A. butterfly
   B. bee
   C. ant

LIVEWORKSHEETS

2. Which animal has eight legs?
   A. spider
