**Read the following passage about Music and its Impact on Human Emotion and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.**

Music is a universal language that has the ability to transcend cultural and linguistic boundaries. From classical symphonies to modern pop songs, music has a profound impact on human emotions. It can **evoke** feelings of joy, sadness, excitement, or even nostalgia. Research shows that listening to music can stimulate brain activity, improve memory, and even help with emotional healing. People use music as a way to express their emotions and connect with others.

In today's digital age, music is more accessible than ever before. Online platforms such as YouTube and streaming services like Spotify have revolutionized how we listen to and discover music. However, some argue that this easy access to music has led to a decline in **appreciation** for traditional music and local genres. **While mainstream music is widely consumed, many smaller and more culturally significant musical traditions are at risk of being overlooked or forgotten.**

Despite the challenges, music continues to be a vital part of our lives. **It** brings people together, whether through concerts, social media, or shared experiences in everyday life. As technology continues to evolve, music will undoubtedly play an even more central role in shaping our society's culture and identity.

**Question 23:** Which of the following is NOT mentioned in the passage?

- A. Traditional music and local genres are becoming more popular due to digital platforms.
- B. Music has the ability to connect people emotionally and socially.
- C. Music can improve memory and brain function.

- D. Paragraph 1

**Question 30:** In which paragraph does the writer mention a possible negative consequence of the rise of streaming platforms like Spotify?

- A. Paragraph 1
- B. Paragraph 1
- C. Paragraph 3
- D. Paragraph 2

**Read the following passage about the Humans and the Environment and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.**

The relationship between humans and the environment is one of mutual dependence[II]. Humans rely on the natural world for essential resources such as air, water, and food. However, over the centuries, human activities have increasingly disrupted the balance of the environment[III]. Industrialization, deforestation, and pollution have all contributed to environmental degradation[III]. As populations grow and technological advancements continue, [IV].

One of the most significant environmental problems today is climate change. Human activities, particularly the burning of fossil fuels, have caused an increase in greenhouse gases, leading to global warming. **This** has resulted in rising sea levels, extreme weather patterns, and the destruction of ecosystems. If current trends continue, the impact on both the environment and human societies could be a ticking **time bomb**. Coastal cities are at risk of flooding, and agricultural systems may face disruptions due to changing weather patterns.

Despite these challenges, efforts are being made to mitigate the damage. Many countries have implemented policies to reduce carbon emissions, promote renewable energy, and conserve natural resources. Individuals also play a crucial role in protecting the environment by adopting sustainable practices such as recycling, using energy-efficient appliances, and supporting eco-friendly businesses. Environmental education has become more **widespread**, empowering people to take action in their own communities.

Ultimately, the future of the environment depends on our collective efforts. **By prioritizing sustainability and working together, it is possible to reduce the damage we have caused and ensure a healthier planet for future generations.** The need for global cooperation and personal responsibility has never been more critical in the fight against environmental degradation.

**Question 31:** Where in paragraph 1 does the following sentence best fit?

**these issues are becoming more urgent and widespread**

- A. [I]                                      B. [II]                                      C. [III]                                      D. [IV]

**Question 32:** The phrase "**time bomb**" in paragraph 2 could be best replaced by \_\_\_\_\_.

- A. Break down                                      B. Run out                                      C. Carry on                                      D. Blow up

**Question 33:** Which of the following is NOT mentioned as a human activity that disrupts the environment?

- A. Industrialization                                      B. Overfishing                                      C. Pollution                                      D. Deforestation

**Question 34:** Which of the following best summarises paragraph 2?

- A. Climate change is caused by human activities, leading to severe environmental impacts such as rising sea levels and extreme weather.  
B. The burning of fossil fuels has caused global warming, which is accelerating the destruction of ecosystems and disrupting agricultural systems.  
C. Coastal cities face immediate threats from flooding due to climate change, while populations and industries struggle to adapt.  
D. Climate change has become a ticking time bomb, and the impact of global warming will be catastrophic if current trends continue.

**Question 35:** The word "**This**" in paragraph 2 refers to \_\_\_\_\_.

- A. The increase in greenhouse gases  
B. The impact of human activities on the environment  
C. Global warming caused by human activities  
D. The rise in sea levels and extreme weather patterns

**Question 36:** The word "**widespread**" in paragraph 3 is OPPOSITE in meaning to \_\_\_\_\_.

- A. Global                                      B. Common                                      C. Extensive                                      D. Limited

**Question 37:** Which of the following is TRUE according to the passage?

- A. Human activities such as industrialization and deforestation have helped maintain environmental balance.  
B. Efforts to reduce carbon emissions and promote renewable energy have been implemented by many countries.  
C. Rising sea levels and extreme weather patterns are not a concern mentioned in the passage.  
D. The passage suggests that environmental education is not important for protecting the environment.

**Question 38:** Which of the following best paraphrases the underlined sentence in paragraph 4?

- A. If we ignore the need for sustainability and act alone, the damage we cause will only worsen, threatening the future of the planet.  
B. Focusing on sustainable practices and collaborating can help heal the damage we have inflicted on the planet, ensuring a better future for all.  
C. By reducing the damage caused by human activities, we can ensure that our planet remains the same for future generations.  
D. Sustainability is not important for the future of the planet; only individual efforts can make a difference in protecting the environment.

**Question 39:** Which of the following can be inferred from the passage?

- A. Sustainable practices and global cooperation are essential to reducing environmental damage.  
B. Climate change is the only environmental problem humans face today.  
C. Human activities have had little to no impact on the environment over the centuries.  
D. Technological advancements are the primary cause of environmental degradation.

**Question 40:** Which of the following best summarises the passage?

- A. The impact of climate change is irreversible, and only technological solutions can address the crisis.  
B. Environmental degradation is a result of industrialization and pollution, and we must act collectively to reduce its effects.  
C. Human activities have caused environmental damage, and both individual and global efforts are needed to solve the problem.  
D. Climate change poses risks to coastal cities and agriculture, but there are efforts to mitigate the damage.
