Read the text about the Internet and human memory. Choose the best option (A, B, C or D).

The Internet and human memory

The Internet is a great (31) _____ in the 21st century. It brings us a lot of conveniences, but it also kills our memory. Nowadays, most of the information is online, and we don't need (32) _____ things. People seem to depend on smart devices and the Internet too much. For example, a lot of people save all their relatives' and friends' phone numbers on their (33) _____ , but they don't even try to remember the important ones. (34) _____ others always use a map app for directions. They don't know how to get to a place even though they've been there many times. What will happen if their smartphones are broken, or they don't have an Internet (35) _____ ? Although the Internet is useful, it is indeed killing our memory.

31	A browser	B invention	C device	D connection
32	A remember	B to remember	C remembers	D remembering
33	A towers	B routers	C smartphones	D speakers
34	A Many	B Much	C Any	D A little
35	A file	B route	C connection	D portal

Read the text about video games. Write *R* (right), *W* (wrong), or *DS* (doesn't say).

Video Games

A video game is a kind of electronic game. Many teenagers or even adults dream of having their game consoles. Teenagers often play video games in their free time to relax. Some of them play video games to train their brains and motor skills. Some video games are called electronic sports, and people play them in competitions. Nowadays, video games come in many different types, such as strategy, simulation, and platform, just like films and books come in different genres. Players can choose the type of their interests. Video games have both good and bad points, but if you are careful and know when to stop, you can enjoy all their benefits.
