| 5. | A. specialties | B. inspirations | C. problems | D. deliciousness |

* **Read the text and decide if the following statements are True or False.**

Fairtrade is a system that helps make trade fairer for farmers in developing countries. It makes sure they receive a fair price for their products and work in safe conditions. One product that really needs Fairtrade support is cocoa, which is used to make chocolate. Many cocoa farmers in West Africa earn very little money and often struggle to support their families. The price of cocoa also changes a lot, so farmers cannot plan for the future. Fairtrade helps by giving them a minimum price that protects them when the market drops. Farmers also receive a Fairtrade Premium, which they can use to improve their communities, such as building schools or buying better tools. Fairtrade rules also try to reduce child labour, which is still a problem in the cocoa industry. By choosing Fairtrade chocolate, consumers can help cocoa farmers live better lives and work in fairer conditions.
