$$\boxed{9} + \boxed{4} = \dots 10 \dots + \dots 3 \dots = \dots 13 \dots$$

Diagram showing the decomposition of 4 into 1 and 3. A blue oval encircles the 9 and the 1, with the number 10 written next to it, indicating the first step of the addition process.

$$\boxed{3} + \boxed{8} = \dots + \dots = \dots$$

Diagram showing the decomposition of 8 into two empty boxes. A blue oval encircles the 3 and the first empty box, with the number 10 written next to it, indicating the first step of the addition process.

$$\boxed{5} + \boxed{5} = \dots + \dots = \dots$$

Diagram showing the decomposition of 5 into two empty boxes. A blue oval encircles the 5 and the first empty box, with the number 10 written next to it, indicating the first step of the addition process.

$$\boxed{7} + \boxed{6} = \dots + \dots = \dots$$

Diagram showing the decomposition of 6 into two empty boxes. A blue oval encircles the 7 and the first empty box, with the number 10 written next to it, indicating the first step of the addition process.

$$\boxed{9} + \boxed{1} = \dots + \dots = \dots$$

Diagram showing the decomposition of 1 into two empty boxes. A blue oval encircles the 9 and the first empty box, with the number 10 written next to it, indicating the first step of the addition process.

$$\boxed{7} + \boxed{5} = \dots + \dots = \dots$$

Diagram showing the decomposition of 5 into two empty boxes. A blue oval encircles the 7 and the first empty box, with the number 10 written next to it, indicating the first step of the addition process.

$$\boxed{3} + \boxed{9} = \dots + \dots = \dots$$

Diagram showing the decomposition of 9 into two empty boxes. A blue oval encircles the 3 and the first empty box, with the number 10 written next to it, indicating the first step of the addition process.

$$\boxed{9} + \boxed{7} = \dots + \dots = \dots$$

Diagram showing the decomposition of 7 into two empty boxes. A blue oval encircles the 9 and the first empty box, with the number 10 written next to it, indicating the first step of the addition process.

$$\boxed{8} + \boxed{5} = \dots + \dots = \dots$$

Diagram showing the decomposition of 5 into two empty boxes. A blue oval encircles the 8 and the first empty box, with the number 10 written next to it, indicating the first step of the addition process.
