So Harry's parents decided to do something. They went into the kitchen where they looked in the (4) and in the cupboards. They found some flour, tomatoes, cheese and vegetables.

Dad made pizzas and Mum (5) the vegetables into small pieces for a salad.

'That smells good,' said the waiter.

The Seasons

Example In many countries there are four seasons in the year. These are
 1 called spring, summer, autumn and winter. Each season is
 about three months long and then a new season comes.
 2 In the north of our planet summer usually begins in June. It
 is the warmest time of the year and it sometimes does not get dark
 3 until 10 o'clock at night. In September it gets colder and the
 4 trees lose their leaves. This season is called autumn. Winter
 5 comes in December when it is usually very cold and a lot of
 countries have snow. On some winter days, it gets dark at about
 6 4 o'clock in the afternoon so the days are very
 7 short and the nights are long.
 In March the weather gets warmer and plants and flowers start to
 8 grow again. This season is called spring.
 9 In the south of the planet the countries have the same seasons,
 10 but they happen at different times throughout the year. They have
 summer in December and winter in June.
