15. What does the sign mean?

- A. You have to keep your shoes safe in this area.
B. You are allowed to wear shoes in this area.
C. You should wear shoes in this area because of safety.
D. You have to wear shoes that can provide protection in this area.

16. What does the notice mean?

- A. Each tour of the castle lasts less than two hours.
B. Two hours is the minimum time recommended for a visit to the castle.
C. Visitors are only allowed to spend two hours inside the castle.
D. Visitors are only allowed to visit the castle at 2 o'clock.

III. Choose the word that best fits the blank space in the following passage. (1.5 pts)

Moments in space history

On October 4, 1957, the Soviet Union sent Sputnik 1 into space and a new age in history began - The Space Age. The Soviets (17) _____ more Sputnik satellites in the fifties and by 1961 they had put the first man into space. Eight years later, an American finally walked on the moon, and during the (18) _____ seventies the US led the Soviet Union in the space race. However, space travel was expensive, and they needed to co-operate more. Nearly two decades later, leaders from both countries said they had agreed (19) _____ plans for a new International Space Station (ISS), and by the turn of the century the ISS had started (20) _____ the Earth. Nowadays, the ISS is used by scientists from all over the world.

At the beginning of the twenty-first century, businessman Dennis Tito told the world he loved space as he spent eight days on the ISS. Since then, space (21) _____ has developed with plans for regular tours and floating hotels. And what about the next half a century? In 2010, the US president Barack Obama told (22) _____ that by the mid-2030s the US would send humans to Mars. The race for Mars has already started.

Adapted From "Life - Pre-Intermediate Student's Book"

- | | | | |
|----------------|-------------|-------------|----------------|
| 17. A. flew | B. gathered | C. launched | D. transmitted |
| 18. A. last | B. early | C. previous | D. recent |
| 19. A. on | B. with | C. at | D. with |
| 20. A. running | B. turning | C. circling | D. orbiting |

21. A. exploration B. research C. science D. tourism
22. A. audiences B. bystanders C. observers D. crowds

IV. Read the following passage. Decide if the statements from 23 to 26 are True or False. Choose the correct answer for questions 27 and 28. (1.5 pts)

A long and healthy life

While in the past scientists have looked at things such as diet and lifestyle for an explanation of long life, these days they are investigating genetics. One such researcher is Eric Topol, who says, 'There must be genes that explain why these individuals are protected from the aging process.'

The new research into long life looks at groups of people who have a genetic connection. For example, one group of interest lives in Ecuador. In one area of the country, there are a number of people with the same genetic condition. It's called Laron syndrome. The condition means that they do not grow to more than about one meter, but it also seems to give them protection against cancer and diabetes. As a result, they live longer than other people in their families. Meanwhile, on the Hawaiian island of Oahu, there's another group of long-lived men, Japanese - Americans. They have a similar gene to the Laron syndrome group.

In Calabria, scientists are trying to work out exactly how much of the longevity is due to genetics and how much to the environment. By checking public records going back to the 19th century, researchers have reconstructed the family trees of 202 nonagenarians and centenarians. They concluded that there were genetic factors involved. And they seemed to benefit the men more than the women - a surprising result because generally in Europe, there are five times more women centenarians than men.

23. Genetics used to be one of the factors for the explanation of long lifespan in ancient times.

24. People with Laron syndrome seem to face lower risks of contracting diabetes than those without.

25. Residents in a certain area of Ecuador have Laron syndrome.

26. According to some research in the 19th century, women lived longer than men.

27. Which following statement is not true?
A. In reality, European females live longer than males.
B. Some Hawaiian people having a long lifespan originated in Japan.
C. Laron syndrome can help people grow exponentially.
D. Genetic factors, lifestyles and eating habits are some factors protecting people from the aging process.
28. According to the passage, what made researchers surprised after checking public records?
A. The number of centenarians and nonagenarians
B. The number of men with long lifespans compared to that of women
C. The number of genetic factors
D. The number of family trees

V. Use the correct form of the word given in each sentence. (1.5 pts)

29. Police do not think this killing was a random act of _____. (violent)
30. It is obvious that there is no _____ which can help you gain knowledge without learning. (invent)
31. Thanks to diverse cultures, our lifestyles differ, and our tastes _____. (variety)
32. The most _____ nation on earth is undergoing the most rapid economic growth in human history. (population)
33. If all supermarkets used recyclable bags, all _____ would be able to help fight pollution. (consume)
34. The village is so remote. It is _____ located and economically underdeveloped. (convenient)

VI. Look at the entry of the word "essential" in a dictionary. Use what you can get from the entry to complete the sentences with two or three words. (0.5 pt)

essential *adjective*

B1

OPAL W

OPAL S

/ɪˈsenʃl/

/ɪˈsenʃl/

★ completely necessary; extremely important in a particular situation or for a particular activity

SYNONYM **vital**

- *an essential part/feature of something*
- *an essential element/ingredient/component of something*
