

B. Match each part of the brain with its function.

- 1 This part of the brain is good at tasks that are both creative and logical, such as making music.
- 2 This part of the brain helps you to respond to, understand and interpret different emotions.
- 3 This part of the brain helps you think—it's like a storage center for memories.
- 4 This part of the brain coordinates complicated activities that require physical and mental skills
