

Numbers: Write the numbers in letters

Remember: When writing large numbers, **divide** them **in groups of three**. For every 3rd number from the right, you need to write “hundred”, IF IT’S NOT ZERO. 1st point (←) = “thousand”, 2nd = million, 3rd = billion ...

Example: 345.298.678.123 =

THREE HUNDRED forty five billion **TWO HUNDRED** ninety eight million

SIX HUNDRED seventy eight thousand **ONE HUNDRED** twenty three.

8 _____
