Technology in Modern Homes

A. Read the Text

Read the passage below carefully.

☐ I have read the text

Paragraph 1

Smart technology is becoming more common in homes today. Many people use smart devices to help manage their homes more easily. These technologies are designed to improve comfort, safety, and efficiency.

Paragraph 2

One example of smart technology is smart appliances. Smart washing machines and air conditioners can be controlled using a mobile phone. This helps people save time and energy. Another example is smart security systems. Devices such as motion sensors and smart doorbells help protect the home and alert homeowners to possible danger.

Paragraph 3

Smart technology also helps people live more comfortably. By using technology, daily household tasks become easier to manage. As a result, smart homes make life more convenient for families.

B. Understanding the Structure

Answer the questions below.

1. How many paragraphs are in the text? _____

2. Match the headings to the paragraphs:

Home Technology Uses	Paragraph 1
Examples of Smart Technology	Paragraph 2
Benefits of Smart Homes	Paragraph 3

3. Which paragraph talks about examples of smart technology?

☐ Paragraph 1 ☐ Paragraph 2 ☐ Paragraph 3
