Hi Luke,

I'm writing this on my new 49..... I got it yesterday. The shop clerk said it was the best one in the shop. It can do lots of things. I can play 50.....on it instead of using my 51..... I can also contact new people by going on 52..... Yesterday, I downloaded apps to chat 53..... It's really cool.

Talk to you soon.

Henry

**Read the text and Write Q (Q-PACE), P (Perseverance), J (James Webb Space telescope).**

Space technology

Researchers said that 2021 was one of the biggest years for space exploration in recent history. In January, NASA sent out a robot spacecraft, Q-PACE, to study small pieces of rock floating in the solar system. They said that it could tell them how the planets first formed and other useful information. In February, another robot, Perseverance, landed on Mars. NASA told reporters that they sent the robots to test the red planets for signs of life. A NASA scientist said that one of the first goals of the space travel was to bring samples of Mars back to the Earth to study. They hope this robot will make that possible. Finally, at the end of the year, the James Webb Space telescope went into space. Scientists said that they would use it to study faraway parts of the universe. The telescope isn't a robot, but they will have robots to fix if anything goes wrong.

**Which robot/ device**

54. landed on mars in 2021?
55. will have robots to fix if it breaks in space?
56. is studying rocks from the solar system?
57. is looking for signs of life on another planet?
58. may help us understand how the planets formed?

**Complete the text with correct words.**

| advantage | disadvantage | opinion | unfortunately |
