READING – Technology & Education **(B1+/B2, ~120 words)**

Technology in Modern Education

Digital technology has become an essential part of modern education. Students use online platforms to access materials, submit assignments and communicate with teachers. Virtual classrooms make it possible to learn from anywhere, which is especially helpful for students who live far from educational centres.

However, relying too much on technology can also cause problems. Technical issues, such as poor internet connection, may interrupt learning. In addition, students sometimes struggle to stay focused when studying online. For this reason, experts agree that technology should support education rather than replace traditional teaching methods completely.

ZADANIE 13 – True / False

1. Technology allows students to learn remotely.
2. Online learning never causes problems.
3. Concentration can be difficult in virtual classes.

ZADANIE 14 – Multiple choice

4. One benefit of technology mentioned in the text is:
 - a) fewer teachers
 - b) easier access to materials
 - c) shorter lessons
5. According to experts, technology should:
 - a) replace schools
 - b) be avoided in education
 - c) support traditional teaching
