

**Solve the problems.**

- 1** The parts in this model are all equal.

What fraction of the model is shaded?

- (A)  $\frac{1}{2}$   
(B)  $\frac{1}{3}$   
(C)  $\frac{3}{2}$   
(D)  $\frac{2}{3}$

- 2** Abigail draws a rectangle. She divides it into equal parts.

**Part A**

What unit fraction names each part of Abigail's rectangle?  
Write your answer in the blank.

\_\_\_\_\_

**Part B**

What fraction names all the parts of Abigail's rectangle?  
Write your answer in the blank.

\_\_\_\_\_

**3** Which models show  $\frac{1}{2}$  shaded?

Choose all the correct answers.

**4** Each circle is divided into equal parts.

Compare the fraction of each circle that is shaded. Explain what is the same and what is different about the shaded parts.
