

## 1. Look at the pictures and write down the names

BUTTERFLY

## 2. Read the paragraph and answer the questions

### ALL ABOUT WHALES!

Whales are mammals! They breathe air like us, the humans. Also, they raise to the surface of the water to breath. They don't live in cities but the ocean the world. Do you know there are many different kind of whales? For example, some are the killer whales, humpback whale and grey whale.

Whales are some of the largest animals! The largest one is the blue whale. It can grow to be a hundred feet long and weigh as much as elephants. It is the largest animal on earth.

Whales leap out of the water. They also dive and roll. Whales dive to get food. Besides, some whales can dive more than a mile down! We can find them in the zoos, public aquariums an entertainment park. These whales live in large glass tanks. They learn things very easy. They are trained to play with a ball, leap and dive down deep for different objects.

1.
