I would like to give a talk about one of the most serious _____ on our planet. It's _____. Global warming is _____ of the _____ on Earth. Energy from the sun _____ the Earth. Power plants, _____ and burning _____ give off carbon dioxide. It goes into the atmosphere and destroys the ozone layer that protects the Earth from the _____. Greenhouse gases _____, so temperatures get higher.

Therefore, the polar ice caps and mountain glaciers are melting and the sea level _____. Coastal cities will _____ and millions of low-lying areas will lose their homes. Global warming is also a serious threat to the wildlife. Animals are in danger of losing their _____. Some of them may become extinct because of climate change. High temperatures can cause extreme and _____.

If animals could speak, they would say that they don't have enough food to eat because it's too hot for plants to survive. Other animals would say that their_____are under water.

If we want to save our planet, we should become more attentive and caring to it.
