

Grade 1 Word Problems – Write the Equation

Name: _____

Grade: 1

Date: _____

Instructions: Read each problem. Write the equation to solve it.

Problem 1

Mia has 5 balloons. Her friend gives her 4 more balloons.

How many balloons does she have in all?

Equation: $\boxed{} + \boxed{} = \boxed{}$

Problem 2

There are 6 cats and some dogs in the yard.

In all, there are 10 animals.

How many dogs are there?

Equation: $\boxed{} + \boxed{} = \boxed{}$

Problem 3

Ben has 9 pencils in all.

Some are red and some are blue.

How many red pencils and how many blue pencils could he have?

Equation: $\boxed{} + \boxed{} = \boxed{}$

Problem 4

There are 7 birds in a tree.

Then 3 more birds come.

How many birds are there in all?

Equation: $\boxed{} + \boxed{} = \boxed{}$

Problem 5

Sara has 12 candies in all.

Some are chocolate and some are fruit candies.

How many of each could she have?

Equation: $\boxed{} + \boxed{} = \boxed{}$

Problem 6

Tom has 14 toys.

He has 9 cars and the rest are balls.

How many balls does he have?

Equation: $\boxed{} + \boxed{} = \boxed{}$
