G Reading: Understanding new words

Read the article about a famous teacher and her pupil and choose the best option to answer the questions.

A famous teacher and her pupil

Anne Sullivan is one of the world's most famous teachers. During her life, she only had one student. This was American author and disability rights campaigner Helen Keller, who later in her life fought for people like herself to have the same educational and employment opportunities as everyone else. When the two first met in 1887, they could not communicate with each other. At that time, Helen was blind, deaf and mute. She lost her sight and hearing after she became ill at the age of 19 months, which meant that she didn't learn to speak as a child.

Anne was 20 when she started working for the Kellers. Helen was seven, and her parents had no control over her. After the first week, Anne took Helen away from the main house to live with her in her cottage.

Anne was the perfect teacher because she understood some of Helen's problems. When Anne was five, she was ill. She contracted an infection that damaged her sight. As a teenager, she attended the Perkins School for the Blind. Here, she learned to use the manual alphabet, but it was a difficult time for her as she endured several unsuccessful operations to improve her eyesight while she was at the school.

At first, Helen did not understand finger spelling. Then one day, she was washing her hands. Anne took one hand and spelled W-A-T-E-R on it. From that moment on, they could communicate. Helen went on to learn nearly 600 words in only a few months. She also became familiar with some multiplication tables and the Braille writing system, which uses raised dots you read with your fingers. Later, Helen learned to lip-read by placing her fingers on the lips of the speaker.

Eventually, Anne persuaded Helen's parents to send Helen to the Perkins School for the Blind. Anne went with her. She continued to tutor Helen although she also had classes at school. Helen made excellent progress and later got a place at Radcliffe College. With Anne's help, Helen ultimately became the first deaf and blind person to get a degree, which was the result of her hard work and her teacher's energy and time.

Anne stayed with Helen even after she graduated. Together they gave lectures about Helen's achievements. Thanks to her amazing teacher, Helen Keller was able to lead a full and happy life despite the problems she had.
