B. keep skunks as pets because they are very intelligent and curious.

## Reading

### 2. Read the text and mark the sentences "T" (True) or "F" (False).

#### Environmental Problems.

Environmental problems are the most burning for modern society. Air, water, land and nuclear pollution have badly damaged nature. People cut down trees, destroy the habitats of thousands of animals, and contaminate water in rivers and seas. Factories pollute our rivers and lakes with dangerous chemicals. The increasing number of cars in towns and cities has led to the growth of the level of carbon dioxide in the atmosphere.

Scientists believe that human activity causes changes of the climate of our planet and destroys it. All these factors have a bad influence on our health. More and more people suffer from allergies and breathing problems. It's almost impossible to find a healthy person nowadays.

We have spent thousands of years fighting for our survival. Yet now we have discovered that our planet is under threat and it's all our fault. Fortunately, it's not too late to solve these problems. We have the time, the money and the technologies to prepare a way for a better, cleaner and safer future. There are simple things we can do if we want to save our planet.

For example, if we stop wasting paper and increase recycling paper and cardboard, we'll save some of the millions of trees which are cut down every year. We also have to stop making unnecessary car journeys so as to cut down air pollution. Governments can help by passing laws to stop wood-producing companies from destroying rainforests and to stop factories from polluting water. Governments can improve public transport so that people have no need to use their cars so much. We can create parks for endangered species.

But the most important thing we must do is to open our eyes and act immediately.

1) The environmental problems are serious enough. \_\_\_\_\_

2) People are separate from nature. \_\_\_\_\_

3) People have the time, the money and the technologies to prepare a way for a better future. \_\_\_\_\_

4) Reducing the number of cars helps to keep air clean. \_\_\_\_\_

5) The laws to stop wood-producing companies from destroying rainforests and to stop factories from polluting water are passed by governments. \_\_\_\_\_

6) People don't create parks for endangered species. \_\_\_\_\_

*Writing*

**3. Complete the sentences with “will” or “be going to”.**

- 1) Alice and her friends \_\_\_\_\_ have dinner together.
- 2) My cousin Joe \_\_\_\_\_ visit his granny today.
- 3) I hope my uncle \_\_\_\_\_ take me to London.
- 4) Bob's sister says she \_\_\_\_\_ help me with my English.
- 5) It's too cold today, so, I \_\_\_\_\_ put my warm jacket on.
