

The Area is Known

Use The Formulae to Calculate

Area of Rectangle is Known

Width $\times$ Height = Area

Width $\times$ 6m = 114 m²

Width = 114 m² $\div$ 6m = 19m

Area of Circle is Known

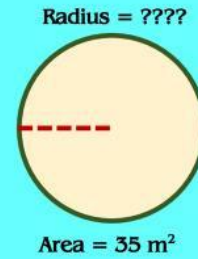

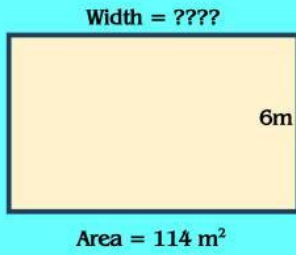

Pi $\times$ Radius² = Area

3.14 $\times$ Radius² = 35 m²

Radius² = 35 m² $\div$ 3.14 = 11.15 m²

$\sqrt{\text{Radius}^2} = \sqrt{11.15^2}$

Radius = 3.3 m

Use $\pi = 3.14$
