WHAT IS YOUR LEARNING STYLE?

If you find yourself learn better by making notes during the lecture, or when the teacher uses a new word, you want to see it written immediately, then you are very likely to be a more **visual** learner. You prefer to see the written words. You learn by reading and writing. Visual learners often think in pictures. If you find a particular task or text difficult, look for sources that will suit your learning style, e.g. sources with illustrations, charts, tables, or videos.

If you prefer recording the lecture and listening again to taking notes, or you memorize something by repeating it aloud instead of writing it out several times, you are probably a more **auditory** learner. You prefer to learn by listening and speaking. Auditory learners often learn best from lectures, discussions, by reading aloud, and by listening to audio material.

However, it is probably that you, like most people, learn through a mixture of styles. Sometimes you may prefer to learn by reading, at other time by listening. Ask yourself which is the best style for the particular task you are doing.

118. Which of the following is probably NOT preferred by a visual learner?
 A. reading aloud B. sources with illustrations C. sources with videos D. making notes

 A. discussive B. noisy C. audible D. recordable

Exercise 10. Read the following passage and mark the letter A, B, C, or D to indicate the correct answer to each of the questions.

BECOMING AN EFFECTIVE STUDENT

Learning how to study effectively is an essential skill for students in any discipline. There are six areas which are crucial to developing good study habits. Work on these and you will become an effective student.

Targets

Always set a realistic work target. Don't try to do too much. For example, plan to read one chapter of a book each evening rather than think about reading the whole book over the weekend. This kind of detailed, planned target is more effective than a **vague** commitment. It is sometimes helpful to tell your friends about your plan. This is a good incentive to keep you on target because they will know if you fail!

Rewards

Develop a system of small rewards for your work. For example, stop for a cup of coffee or tea, or listen to a favorite piece of music after one hour's study. Rewarding yourself for keeping to your work plan will make you feel good about yourself.

Timing

Make sure you choose a suitable time to study, i.e. when it is quiet and when you are most alert. Try to make this a regular, time-tabled part of your day. If you plan to start work at a certain time, say 7 pm, do not find reasons to put off getting started. You can watch a DVD later, and your emails are not urgent!

Quantity

A large task such as researching a new topic for an essay can be **daunting** - so daunting, in fact, that it can be difficult to sit down and make a start. Break the larger task down into several smaller ones. For example, make a list of questions that you will have to deal with in your essay, and then approach each question separately. This makes the work more manageable.

Notes and Learning styles

The books you are studying won't always present information in a way that suits your learning style. It is, therefore, worthwhile spending time making notes and organizing them in a way that suits you best. It is also a good idea to keep your notebooks neat and well-organized. This will make it much easier to retrieve information later.

Revision

Don't leave revision until the last moment. When you set your study targets, allow regular revision time. This is much more effective than trying to **cram** before an exam.

123. How does the writer think you can develop good study habits?

- A. By setting a realistic work target
- B. By planning and considering your learning style
- C. By revising your work on a regular basis
