

ورقة عمل

اوجد البارامترات a, b, c في معادلة الدالة التربيعية ,  $a \neq 0$ :

| المعادلة              | a | b | c |
|-----------------------|---|---|---|
| $Y = -9X^2 + 4X - 6$  |   |   |   |
| $Y = X^2 + 14X$       |   |   |   |
| $Y = X^2 - 88 + 17X$  |   |   |   |
| $Y = X^2 - 81$        |   |   |   |
| $Y = 100 - X^2$       |   |   |   |
| $Y = 24X - 15 X^2$    |   |   |   |
| $Y = 8X^2 + 6X - 20$  |   |   |   |
| $Y = 3X^2 + 15X$      |   |   |   |
| $Y = 2X^2 + 14X - 28$ |   |   |   |
| $Y = X^2 + 30$        |   |   |   |
