Read and write true / false. Přečti a napiš pravda / nepravda.

In the ZOO

There are lots of animals. I like the dolphins, they're very friendly. They're bigger than penguins. The dolphins are between the elephants and the lions. Where are the monkeys? They're opposite the parrots. The monkeys are funny, they aren't dangerous. And here are the big and fat hippos. They're bigger and fatter than tigers. The tigers are next to hippos. There are three tigers – a mum tiger, a dad tiger and a baby tiger. The baby tiger is younger and smaller than the mum tiger. The baby tiger is black and white and orange, it isn't red or green. Are there any parrots in the ZOO? No, there aren't any parrots, I'm sorry.

There aren't any dolphins in the ZOO. True False

The dolphins aren't friendly. True False

The penguins are bigger than the dolphins. True False

The monkeys aren't dangerous. True False

The monkeys are opposite the parrots. True False

The hippos are fat and big. True False

The hippos are next to tigers. True False

There are three tigers. True False

The baby tiger is older than the mum tiger. True False

The baby tiger isn't orange. True False

There are ten parrots in the ZOO. True False
