

English Worksheet: Unit 13 – Nature & Environment (Level B1)

Name Surname _____ Date _____

Choose the correct option to complete the sentences:

1. Many species are in danger of extinction due to habitat _____.

a) pollution b) loss c) damage

2. We should try to _____ as much paper and glass as possible.

a) reuse b) reduce c) recycle

3. The _____ layer protects the Earth from harmful UV rays.

a) oxygen b) ozone c) greenhouse

4. Global warming leads to the _____ of polar ice caps.

a) flooding b) melting c) heating

5. Heavy _____ caused the river to burst its banks.

a) drought b) breeze c) rainfall

Answer the questions with 'Yes' or 'No' based on general environmental facts. Then answer in full with your comments:

1. Is solar energy considered a renewable source of energy?

2. Does deforestation help in reducing the amount of CO₂ in the atmosphere?

3. Can global warming cause more frequent extreme weather events?

4. Is the 'greenhouse effect' always a negative phenomenon for Earth's survival?

5. Are single-use plastics biodegradable?

Match the words (1-5) with their definitions (A-E)

Term (Word)	Definition
1. Endangered species	A. The natural environment in which a particular animal or plant lives.
2. Habitat	B. The process of clearing a wide area of trees, often for agricultural use.
3. Renewable energy	C. A type of animal or plant that might soon no longer exist.
4. Deforestation	D. Energy that is produced from natural sources like the sun or wind.
5. Fossil fuels	E. Natural substances such as coal or oil that are burned to produce energy.

Eco-Project "Green School":

Imagine your school wants to become more eco-friendly. Write 5-7 sentences suggesting specific changes. Use structures like: 'We should...', 'Instead of...', 'It is vital to...'

Key points to cover: waste management, energy saving, and plastic use
