30 offers the chance to take part in winter  
activities? .....

**A**

### SHREWSBURY INTERNATIONAL CARTOON FESTIVAL

My friends and I are having a fun time at this year's Shrewsbury International Cartoon Festival. It's a three-day event that takes place every year in the middle of August. This year the theme of the cartoons is sports. You have a unique opportunity to see the cartoonists at work, too. It's the weekend now and there are 20 artists creating huge cartoons in the Square. They are absolutely amazing! Fay is sitting very still at the moment, because an artist is doing a cartoon drawing of her face. I fancy having a go at the 'Your Face or Mine' workshop. You get tips on drawing funny faces and expressions. It opens on Saturday at 10:30 am and Fay and I are really looking forward to it.

### SAPPORO SNOW FESTIVAL

Here in Sapporo, in February it's very cold and people are celebrating the most famous winter festival in Japan, the Sapporo Snow Festival. It attracts about two million people every year and lasts a week. The hundreds of beautiful snow statues and ice sculptures on display in the three festive sites are impressive. The festival begins with an opening ceremony. Lots of fun events follow, including rides in snow slides, snow-rafting and bamboo skiing! Right now we're watching the Ice Sculpture Contest. Sixteen teams from countries from all over the world are competing and creating spectacular works of art. I like the Chinese sculpture the best! It's called a "Girl's Smile". I bet they win.

Problems

I'm here with River Valley School at the Mathematics Festival at the University of Birmingham, UK. We're staying here for two days, September the 14th and 15th. The festival opens at 9:30am with a welcoming speech and finishes at 3:30 pm on each day.

Right now, we're in a great hall and the talk on 'Mathematics in Sport' is very interesting. My classmate Paula and I can't wait to take part in the Maths workshop tomorrow. We are very keen on solving difficult puzzles and developing our Maths skills. I hope our team gets first prize. Maths is challenging and fun!
