Group: _____

By: Sriyanti

Activity 1

Short Story

Short Story:

On the island of Sulawesi, there lives a rare endemic animal called the Anoa. This animal can only be found in the forests of Sulawesi and nowhere else in the world. However, in recent years, the Anoa population has decreased due to deforestation, illegal hunting, and habitat destruction. To address this problem, the government and local communities have begun conservation efforts, such as protecting forest areas and preventing illegal hunting. These efforts are expected to help preserve the Anoa and prevent it from becoming extinct.

Questions

1. Based on the story above, what is meant by endemic fauna?

Answer: _____

2. Why is the Anoa considered a protected animal?

Jawab: _____

3. Mention two main threats to the survival of the Anoa.

Answer: _____

4. What are examples of conservation efforts mentioned in the story to protect the Anoa?

Answer: _____

Activity 2

Getting to Know Flora and Fauna in Indonesia

Instructions

Fill in the following table with the correct information!

No.	Aspect	Flora	Fauna
1.	Definition		
2.	Two examples in Indonesia		
3.	Distribution in Indonesia		
4.	Benefits for human		
5.	Threats		
6.	Conservation efforts		

Activity 3

Conservation Reflection

Instructions

Answer the following questions clearly and correctly!

Questions:

1. Why do you, as a student, need to care about the conservation of flora and fauna?

Answer: _____

2. What can you do to help maintain biodiversity in your surroundings?

Answer: _____

3. What are the impacts if humans do not preserve plant and animal sustainability in Indonesia?

Answer: _____

4. What is the role of schools in developing environmental awareness?

Answer: _____

5. Tell one real example in your surroundings that shows efforts to conserve nature!

Answer: _____
