Thank you for your attention.

Ali Hussain

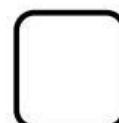

Dear Editor,

I am writing for protecting a Bahraini bird .The bulbul feeds on fruits and flies . It is as attractive as other animals, like red pandas .The bulbul is a beautiful bird , the world may lose. We should do everything to save this amazing creature.

For all of the above reasons , people must protect these wonderful birds from dying out .

There are many reasons why bulbuls are endangered. Firstly, hunters hunt baby chicks for trade .Secondly, the climate is changing and it decreases the number of bulbuls . So the government must make fines on hunters . Also they should protect the homes of bulbuls .
