Câu hỏi: Dan thinks plastic skateboards are

- A. cheap
- B. popular
- C. light

Bài nghe:

Man: Do you want one made of wood or plastic?

Dan: Plastic. I know they aren't always **cheap (A)**, but **all my friends have plastic ones (B)**. My brother's plastic board has **strong, heavy wheels**.

Bẫy:

- **Cheap (A):** Dan nói rõ "*they aren't always cheap*" → **phủ định trực tiếp**, loại A.

- **Light (C):** Nghe thấy "*heavy wheels*" → **plastic không nhẹ**, loại C.

Từ khóa: "**all my friends have plastic ones**" → dấu hiệu rõ của **popular** (phổ biến).

→ Cần chú ý ý kiến thực sự của người nói, đặc biệt là các câu **phủ định hoặc so sánh ngầm**.

The Process of Making Natural Rubber Products

Natural rubber is an important material used in many everyday products. It comes from rubber trees that grow in warm countries. To collect rubber, workers make a small cut in the tree and collect latex, a white liquid that slowly flows out. This latex is the main material for making rubber.

After collecting the latex, workers remove leaves, dirt, and other small pieces from it. They pour the liquid through a sieve to make sure it is clean. Then, the clean latex is heated and dried. During this stage, the rubber becomes thicker and stronger.

Next, the rubber is shaped into different forms. Workers often roll the rubber to make it smooth and easy to use. One popular product made from natural rubber is a bouncy ball. This ball can jump high and is very popular with children.

Natural rubber is useful because it is safe, flexible, and easy to shape. Many people use rubber products every day without thinking about how they are made.
