PRACTICE SHEET 2: Geometry & Measurement
(Angles, triangles, quadrilaterals, perimeter, area of irregular shapes)

Rules:

✓ Angles

Triangle = 180°

✓ Perimeter

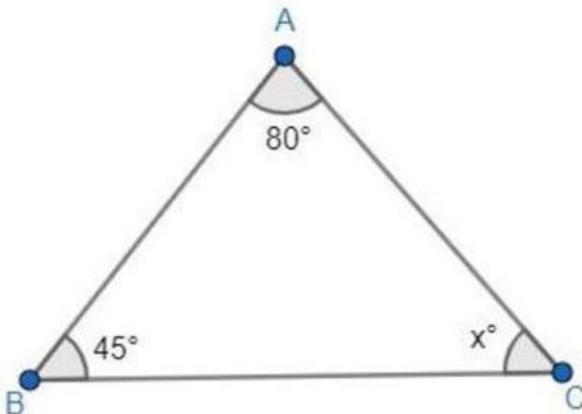

Add all sides

✓ Area of rectangle

Length \times width

Quadrilateral = 360°

Find the missing angle in the triangle.

Example:

Key rule:

The interior angles of a triangle always add up to: 180°

You are given:

Angle at A = 80°

Angle at B = 45°

Angle at C = x°

So: $80^\circ + 45^\circ + x^\circ = 180^\circ$

Add the known angles: $125^\circ + x = 180^\circ$

Now subtract: $= 180^\circ - 125^\circ$

$$x = \boxed{55^\circ}$$

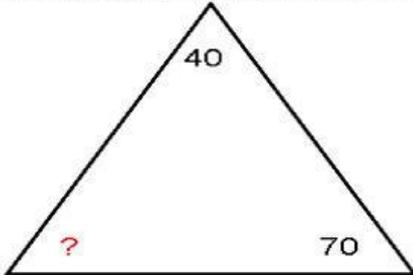

Final Answer:

$x = 55^\circ$

1. a) Find x _____
 b) Name the type of triangle and draw it in the box below.

<p>Another triangle has angles 45°, 45° and x°.</p>	<p>Name of Triangle: _____</p>
<p>a. Calculate the value of x</p>	<p>b. Draw</p>

2. Multiple Choice: Select the correct answers by circling the letter only.

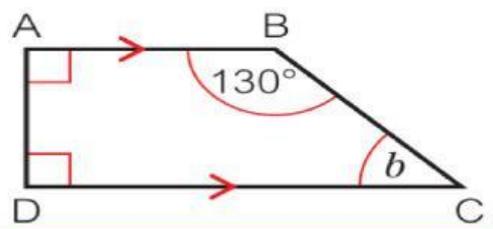

- A. 70
- B. 20
- C. 90
- D. 120

3. The sum of the interior angles of any quadrilateral is equal to _____

- A. 180°
- B. 90°
- C. 360°
- D. 120°

4. Find the angle b°

Do your calculation here to find angle b

Word problem.

1. A student walks 2.75 km in the morning and 1.85 km in the evening. Find the total distance walked. _____ km.

2. A garden has sides 6 m, 10 m, 8 m and 12 m. Find the perimeter. _____ m

--

3. A triangular road sign has two angles measuring 45° and 70° .

- a) Find the third angle.
b) Explain which rule you used.

Find the third angle. Show your calculation.	Rule used:
--	------------

4. A rectangular classroom is:

Length = 12 m

Width = 8 m

- a) Find the perimeter of the room
b) Find the area of the floor
c) If carpet costs 25 QAR per m^2 , find the total cost

Perimeter:	Area	Total cost:

5. A metal frame is shaped like a quadrilateral. Three of its angles are:

90° , 110° and 85°

- a) Find the missing angle
b) State the angle sum rule used
