- e. Don't worry. It doesn't matter.
- f. How could I say no? I love your food.

G. Read the text and answer the questions.

Holidays in SPACE!

If you think space travel is for astronauts only, you are wrong! Forty years after Yuri Gagarin went to space for the first time in history, Dennis Tito became the world's first space tourist. Dennis stayed almost eight days in the International Space Station. Of course, he had to pay 20 million dollars and spend 900 hours on training!

Today, space holidays are becoming more popular and cheaper. In the future, space flight companies are going to give people the chance to travel to space for 250,000 dollars only! It still sounds like a rich person's holiday, but this means that space travel is going to become a bit cheaper every year.

We might even see a space hotel opening in the future! The hotel will be the most expensive in the galaxy and it will cost \$5 million for 3 days. So, if you like the idea of looking at the Earth from space, now you know what to ask for your next birthday present!

1. Do you have to be an astronaut to go to outer space?

2. Who was the first person to go to outer space?

3. How much did Dennis Tito have to pay to go to outer space?

4. How much will people pay in the future to go to outer space?

5. Is there a hotel in outer space?
