2 **W każdym ze zdań 1–6 podkreśl poprawną odpowiedź a lub b zgodnie z treścią tekstu.** (..../6 pkt)

Schools of the future.
Future schools will change a lot. First of all, there won't be any school buildings or traditional classrooms as no one will go to school in person. Everyone will study on-line. What is more, each student will decide when he / she wants to learn and what material he or she prefers. Secondly, there won't be any real teachers. Special robots will give lessons and check students' knowledge. Students will choose the teacher – robots they want to study with and personalize them. They will decide about the appearance, voice and character of the teacher robot. Thirdly, there won't be paper books or notebooks anymore. Students will use digital books and do homework using laptop keyboards or smartphone touch screens. As teamwork is really important, students will work together on different projects. However, they will not meet face to face, but they will meet online. They will use webcams, microphones and good quality speakers when working on projects. They will look for information on the Internet and use special multimedia resources prepared by schools. Parents will get short text messages with information about their kids every day. There will also be a special website for parents with detailed data about their son or daughter. Finally, there won't be any school trips or PE lessons. Instead of going on a trip by bus, students will put on special 3D glasses and will go on virtual trips to many amazing places. Sports and PE lessons will be virtual too. Students will play special 3D games, and thanks to them they will keep fit and healthy.

1 Schools of the future
a will be different. **b** won't change much.
2 Students will decide
a only about the time they learn. **b** about the time, material and teachers.
