Question 35. **A.** before **B.** since **C.** while **D.** until

Read the passage and choose the correct answer in each of the following questions.

1. Forest fires are terrifying events that can have damaging impacts on the environment and people's lives. Some places, like Australia and California, are more likely to be affected by forest fires. In these regions, the hot and dry weather, along with strong winds, creates conditions where fires can spread quickly.

2. Most forest fires are caused by human activities. Sometimes, people leave their campfires unattended, which can lead to a fire getting out of control. Discarded cigarettes carelessly can also start fires. Lightning strikes during hot summers can **spark** fires as well.

LIVEWORKSHEETS

3. Forest fires are very dangerous. In a forest fire, people and animals could die due to breathing the harmful smoke. Forest fires can also harm the environment. When a forest fire occurs, it can destroy large areas of woodland, leading to loss of habitat for animals and disruption of ecosystems. In addition, forest fires release greenhouse gases into the atmosphere, contributing to climate change.
