

Write the missing term

$$P = \square V$$

A diagram of a resistor in a circuit. The resistor is represented by a rectangle with a zigzag line through it. It is connected to a battery (represented by a circle with a plus sign) and a switch (represented by a circle with a diagonal line). The formula $P = Pt$ is written next to the resistor.

$$P = I^2 \square$$

$$P = \frac{\square}{R}$$
