

WHAT ARE AQUATIC ECOSYSTEMS?

How can we look after ecosystems?

45 IDENTIFY who must help to protect ecosystems. WRITE A (authorities) or P (people).

- a. They prevent and fight forest fires.
- b. They do not leave rubbish in the countryside.
- c. They create protected areas like national parks.
- d. They create laws to limit hunting, fishing, construction, etc.
- e. They turn off the tap while they brush their teeth.
- f. They sort their rubbish at home for recycling.
- g. They identify endangered species that need protection.

46 WRITE the ways to protect ecosystems.

save energy

recycle waste

respect nature

save water

We can take short showers instead of baths.

We can use energy-saving devices and public transport.

a. _____

b. _____

We can sort our rubbish and put each type in its recycling bin.

When we go to the countryside, we must respect animals and plants.

c. _____

d. _____
