

Drag the circle to the correct response.

In water, an electronegative oxygen is attracted to other water molecules hydrogens' slightly -----.

- ☐ electronegative charge
- ☐ positive charge
- ☐ negative charge
- ☐ neutral charge

Drag the arrow to the correct answer.

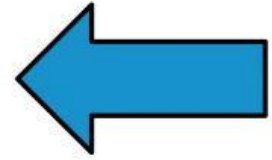

Hydrogen bonds occur between different molecules due to the unequal sharing of electrons.

True

False

Drag the arrow to the correct answer.

Adhesion is a property of water that allows it to stick to other substances such as the walls of vessels.

True

False

Drag the circle to the correct response.

Cohesion is responsible for water transport in plants. It transports against

- ☐ soil
- ☐ UV rays
- ☐ vessels
- ☐ gravity

Drag the circle to the correct response.

Surface tension allows water to resist _____ force.

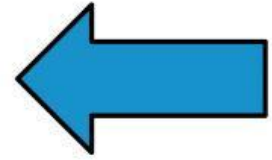

- ☐ internal
- ☐ inside
- ☐ external
- ☐ centripetal

Have you ever been in a swimming pool on a hot day, but it has been cooler outside in the days before? The pool was probably cold! In the text box below, describe how this relates to specific heat.

Type here.

Drag the arrow to the correct answer.

Liquid water is less dense than ice.

True

False

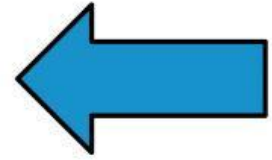

**Drag the circle to the
correct response.**

**Water _____
when it freezes.**

- ☐ expands
- ☐ contracts
- ☐ has the same density
- ☐ warms up

Drag the arrow to the correct answer.

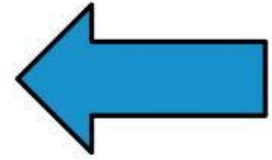

There is about 35% salt in ocean water.

True

False

Drag the arrow to the correct answer.

The melting and freezing point of water is 0°C.

True

False
