Name:_____ Date:_____

🐾 Wild Encounters: Gerunds and Infinitives

Instructions

Carefully examine the following dialogues between field researchers at a Mexican biosphere reserve. They are documenting the behaviors of local wildlife and need help completing their reports.

Fill in each blank with the correct form of the verb in parentheses. Use either the **Gerund** (example: *observing*) or the **Infinitive** (example: *to observe*).

💡 **Quick Tip:**

- Use **Gerunds** (-ing) after prepositions and specific verbs like *enjoy, finish, keep, mind, avoid, suggest.*
- Use **Infinitives** (to...) after adjectives and verbs like *want, decide, need, hope, promise, plan, intend.*

Part 1: The Jaguar Sanctuary 🐆

Elena: Carlos, I've been trying **1.** _____ (track) the jaguar family near the river for several weeks now, but they are incredibly elusive.

Carlos: I suggest **2.** _____ (wait) by the watering hole at dusk. They frequently venture there to drink. Have you managed **3.** _____ (set) up the motion-sensor cameras yet?

Elena: I finished **4.** _____ (install) them yesterday. I don't mind **5.** _____ (stay) late tonight if it means finally seeing them in their natural environment.

Carlos: We must avoid **6.** _____ (disturb) their habitat, so we'll need to remain perfectly still. If we keep **7.** _____ (observe) from a distance, they might grow accustomed to our presence.

Elena: I hope **8.** _____ (capture) some clear footage for the documentary. I promised **9.** _____ (submit) my report by Friday!

Carlos: Don't forget **10.** _____ (check) the battery levels before we head out.

Part 2: Sea Turtle Conservation 🐢

On the coast of Quintana Roo, researchers work through the night to ensure the safety of sea turtle hatchlings.

Researcher A: These sea turtles have finished **1.** _____ (nest), so now our priority is protecting the eggs from predators.

Researcher B: I plan **2.** _____ (patrol) this stretch of the beach until sunrise. It's too risky **3.** _____ (leave) the nests unguarded.

Researcher A: It is vital **4.** _____ (keep) all artificial lights switched off so the hatchlings don't get disoriented. They need **5.** _____ (follow) the moonlight to find the ocean.

Researcher B: I enjoy **6.** _____ (help) these tiny creatures. Have you considered **7.** _____ (volunteer) for the whale shark project next month?

Researcher A: I definitely intend **8.** _____ (apply) for that. I want **9.** _____ (learn) more about marine migration patterns.

Researcher B: You should avoid **10.** _____ (wait) too long to send your application; the positions fill up quickly!
