

Read the text and do the tasks

My Life Online

My name is Mark and technology plays an important role in my life. I use my smartphone and laptop every day for school and entertainment. I often search for information online to do my homework. I also use educational apps to improve my English.

In my free time, I enjoy watching videos and reading blogs about technology. I have recently created my own social media account where I share photos and short videos. However, I try not to spend too much time online because I know it can be unhealthy.

Last year, I joined a digital photography club at school. We learned how to edit photos and create videos. It was exciting and helped me develop new skills. I believe technology is useful if we use it wisely.

Task I. Choose **T** (true) or **F** (false).

1. Mark never uses technology for school. _____
2. He sometimes searches for information online. _____
3. He has created a social media account. _____
