COLEGIO EPISCOPAL LA ANUNCIACION

English Test P3

Name: _____ Grade: _____ Date: ____ ____ _____

Topic: *Your virtual self P3* Teacher: Jean Saint Hilaire

I. Circle the word that complete each sentence(Obligation, advice and permission)

On social media, we (1) **should / can** connect and communicate with others. And we (2) **may / have to** find people with similar interests. We (3) **must / can** share ideas with our new friends even if we aren't in the same location. Even though we don't see our new friends face to face, they (4) **must / can** become important people in our lives. This is why social media (5) **can / should** be so amazing. We all (6) **should / have to** be thankful to technology for bringing people together. With social media, it (7) **can't / shouldn't** be hard for anyone to be connected.

II. Read. Choose True or False..

Robots working in your home

Cyborg anthropologist Amber Case says that today, most people are like cyborgs. She says that although we are human, we are also part machine. We're part machine because we rely on technology so much. So, if we are cyborgs, what is a machine that has human abilities and features? A robot?

Robots, or robotic machines, build and assemble things in factories. They are digitally programmed to do specific jobs, like put together the parts of a car. These robots do the same task over and over again. They can do jobs that humans used to do, but they are not like humans at all. They are just very fancy tools.

However, scientists are making new kinds of robots. These robots are programmed to act like humans. Some even look like humans. They can communicate with us and do many different tasks. The purpose of some of these robots is to take over human jobs in our homes, schools and at work. For example, there are robots that can babysit, take care of old people, and take and deliver food orders. Someday, robots may even be able to cook our meals and fold our laundry!

These robots do not fit the definition of the 'calm technology' Amber talks about. Instead of working quietly in the background, these human-like robots will constantly be around us. Will the jobs these robots do improve our lives? Will their constant interruptions to our private lives be worth it? We may have to try living with one before we know for sure.

	T	F
1. Robots are part human and part machine.	☐	☐
2. Robots have the ability to take care of people.	☐	☐
3. Someday, we will be able to communicate with robots.	☐	☐
4. Human-like robots are a kind of 'calm technology'.	☐	☐
