

FRAZIONI COMPLEMENTARI

- 1 Ogni figura rappresenta l'intero. Scrivi a sinistra la frazione corrispondente alla parte colorata e a destra la frazione complementare come nell'esempio.

Esempio:

2 Scrivi la frazione complementare. Osserva l'esempio.

$$\frac{5}{8} + \frac{3}{8} = \frac{8}{8}$$

$$\frac{7}{12} + \frac{5}{12} = \frac{12}{12}$$

RICORDA!

Le frazioni complementari sono quelle frazioni la cui somma forma l'intero.

$$\frac{3}{4} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{7}{15} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{5}{13} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{12}{25} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{3}{8} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{5}{30} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{24}{60} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{18}{24} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

3 Colora nello stesso modo le frazioni complementari.
