The Continents

READING COMPREHENSION ACTIVITY

There are seven continents on Earth. Africa is hot and has many animals. Antarctica is very cold and covered in ice. Asia is the largest continent and is home to many countries. Europe has many old cities and famous landmarks. North America has big cities and beautiful nature. South America has rainforests like the Amazon. Australia is the smallest continent and is also a country. Each continent is different, but all are important parts of our world.

A. Read the text and decide whether the sentences are true or false.

1.	There are six continents on Earth.	True	False
2.	Africa has many animals.	True	False
