

3

Calculate in a convenient way

a) $\frac{599}{1\,000} + \frac{377}{1\,000} + \frac{1}{1\,000}$

$$= \left(\frac{\quad}{\quad} + \frac{\quad}{\quad} \right) + \frac{\quad}{\quad}$$

$$= \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$= \frac{\quad}{\quad}$$

b) $\frac{15}{4} + \frac{15}{16} + \frac{5}{16}$

$$= \left(\frac{\quad}{\quad} + \frac{\quad}{\quad} \right) + \frac{\quad}{\quad}$$

$$= \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$= \frac{\quad}{\quad}$$
