

FUTURE "WILL"

Before Reading - Predictions

Look at the verbs in the Word Bank.

Choose three verbs and write one prediction about medicine in 2050 for each. Each prediction should be a complete sentence of at least 10–12 words, explaining how or why it will happen.

Word Bank

change disappear improve
assist appear
receive develop use
continue replace

Example:

develop → Scientists will develop new vaccines that prevent diseases before they even start, improving global health..

1. _____

2. _____

3. _____

Guided Writing: Complete the Text

Complete the following text about the future of medicine. In each blank, write a complete and logical idea using will or won't. You may use words from the Word Bank to help you develop your ideas, but you can also include other vocabulary.

In the future, medicine will change in many ways. One important change is that _____, and doctors will use advanced technology to _____. Artificial intelligence will be important because _____, and robots will help doctors during surgeries, but they won't replace human professionals because _____. Patients will receive medical advice online, which will allow _____, and hospitals will also _____ to provide better healthcare.

Grammar Practice : Complete the sentences using will.

Example: Doctors will help people.

Doctors _____ find new cures.

People _____ live longer.

Scientists _____ create better vaccines.

Hospitals _____ use new technology.
