

# 46 Choosing the correct operation (1)

*Circle the corresponding equation for each problem*

- 1 Naji has marbles. He gives his brother 25. Now he has 68.  
How many marbles did Naji have?

$25 + 68$

$68 - 25$

- 2 Naji has 75 marbles. He gives some to his brother. Now he has 18. How many marbles did Naji give to his brother?

$75 + 18$

$75 - 18$

- 3 Dida has 43 stamps. She has 9 stamps more than Karim.  
How many stamps does Karim have?

$43 + 9$

$43 - 9$

- 4 Karim has 35 stamps. Dida has 8 stamps more than Karim.  
How many stamps does Dida have?

$35 + 8$

$35 - 8$

- 5 There are 27 apples in a box.  
Houssam adds 3.  
How many apples are there in the box now?

$27 + 3$

$27 - 3$

- 6 There are 27 apples in a box. Houssam eats 3.  
How many apples are there in the box now?

$27 + 3$

$27 - 3$
