

My objective is To: use tables, equations, and graphs to represent relationships.

6. Multiple Representations Winslow earns \$15.50 for each lawn that he mows.

- a. Represent the relationship between the number of lawns mowed m and his total earnings e with an equation.

- b. Represent the relationship in a table for 0, 1, 2, and 3 lawns mowed.

Lawns mowed (m)	Earnings (e)
