

Lesson 1 : Effect of Geosphere (Types of Soil)

Complete the table to compare between types of Soil

Very little humus	Minerals stay near the top because the soil holds water	Plants need long roots.	Crops can grow only with extra water (irrigation)	Rich in humus	Minerals are deep in the ground
-------------------	---	-------------------------	---	---------------	---------------------------------

	Forest soil	Desert soil	Grassland soil
A mount of humus	Little humus		
Minerals		Rich in minerals	
Growing of crops			Very good for growing crops
