UP English Center

Name: _____

Class: _____

1. Look at the picture and read the questions. Then write down the answer using "enough", "too many", or "too much".

EX: There aren't **enough** blackberries.
There are **too much** butter.

LIVEWORKSHEETS

2. Read the text and answer the questions.

Today, our planet faces many environmental problems. These problems happen because people use too many resources and create a lot of waste. One important problem is air pollution. Smoke from cars and factories makes the air dirty. This can make it hard for people to breathe and can cause health problems.

Another problem is plastic waste. People use plastic bags, bottles, and cups every day. Many of these items are thrown away after one use. Plastic often ends up in rivers and oceans. Animals may eat plastic by mistake, and this can make them sick or even kill them.

Water pollution is also a big issue. Dirty water can come from factories or rubbish thrown into rivers. This affects fish and other sea animals. It also makes water unsafe for people to use.

Deforestation is another problem. People cut down trees to build houses or farms. However, trees are very important. They give us oxygen and provide homes for animals.

To help the environment, people can reuse and recycle things, use less plastic, save water, and use buses or bikes instead of cars. Small actions every day can help protect our planet.

LIVEWORKSHEETS

1. What are some environmental problems mentioned in the text?

2. Why is air pollution harmful?

3. Where does plastic waste often go?

4. How can plastic waste affect animals?

5. What do you do to help the environment in your daily life?

6. What can your family do to reduce waste?

LIVEWORKSHEETS

3. Write about this story "Fred and the tiger".
